

Novus Therapeutics Reports Third Quarter 2017 Results

November 8, 2017

IRVINE, Calif., Nov. 8, 2017 /PRNewswire/ -- Novus Therapeutics, Inc. (NASDAQ: NVUS), a development stage specialty pharmaceutical company focused on the development of products for disorders of the ear, nose, and throat (ENT), announced financial results for the quarter ended September 30, 2017.

For the third quarter of 2017, Novus reported a net loss of \$3.0 million, or \$0.43 loss per share, compared to a net loss of \$2.0 million, or \$4.35 loss per share, for the same period in 2016. For the nine months ended September 30, 2017, Novus reported a net loss of \$11.0 million, or \$2.25 loss per share, as compared to a net loss of \$4.1 million, or \$9.09 loss per share, for the first nine months of 2016. Novus ended the third quarter 2017 with \$19.1 million in cash and cash equivalents.

Research and development (R&D) expenses were \$517,000 during the third quarter of 2017 compared to \$1.1 million for the same period in 2016.

For the nine months ended September 30, 2017, R&D expenses were \$1.5 million, compared to \$2.3 million for the same period in 2016. The decrease in R&D expense for both periods is primarily due to decreased spending towards the OP-01 program, offset by wind-down costs incurred for legacy Tokai programs. We expect R&D expenses to increase in subsequent periods as we advance our OP-02 program.

General and administrative (G&A) expenses were \$2.5 million for the third quarter of 2017 compared to \$0.6 million for the third quarter of 2016. For the nine months ended September 30, 2017, G&A expenses were \$9.5 million, compared to \$1.3 million for the first nine months of 2016. The increase in G&A expense for both periods is primarily due to merger related expenses of \$7.2M, plus legal costs associated with the legacy Tokai litigation and administrative costs associated with operating as a publicly traded company.

"We are continuing formulation development and clinical planning activities for our OP-02 program and we are expecting to begin our clinical trials in 2018," said Gregory J. Flesher, Chief Executive Officer of Novus Therapeutics. "As a potential first-in-class treatment option to both treat and prevent otitis media, OP-02 has the ability to dramatically improve the lives of millions of patients around the world."

About Novus Therapeutics

Novus Therapeutics is a development stage specialty pharmaceutical company focused on the development of products for disorders of the ear, nose, and throat (ENT). Novus has two technologies, each of which has the potential to be developed for multiple ENT indications. The company's lead product (OP-02) is a surfactant-based, combination drug product being developed as a potential first-in-class treatment option for patients at risk for or with otitis media ("OM") (middle ear inflammation and effusion with or without infection). Globally, OM affects more than 700 million adults and children every year. OM is a common disorder seen in pediatric practice, and in the United States is the most frequent reason children are prescribed antibiotics and undergo surgery. Novus also has a foam-based drug delivery technology (OP-01), which may be developed in the future to deliver drugs into the ear, nasal, and sinus cavities. Forward-looking Statements

Any statements in this press release about the company's future expectations, plans and prospects, including statements about its strategy, future operations, development of its product candidates, the review of strategic alternatives and the outcome of such review and other statements containing the words "believes," "anticipates," "plans," "expects," "may," and similar expressions, constitute forward-looking statements within the meaning of The Private Securities Litigation Reform Act of 1995. Forward-looking statements include, but are not limited to, expectations regarding the timing for the commencement and completion of our clinical trials and our ability to accelerate the development of our drug candidates. Actual results may differ materially from those indicated by such forward-looking statements as a result of various important factors, including: the sufficiency of the company's cash resources; the ability to timely develop and manufacture clinical batches of our study drugs; the ability to obtain necessary approvals to commence additional clinical trials; whether data from early clinical trials will be indicative of the data that will be obtained from future clinical trials; whether the results of clinical trials will warrant submission for regulatory approval of any investigational product, any such submission will receive approval from the United States Food and Drug Administration or equivalent foreign regulatory agencies and, if we are able to obtain such approval for an investigational product, it will be successfully distributed and marketed. Any forward-looking statements contained in this press release speak only as of the date hereof and not of any future date, and the company expressly disclaims any intent to update any forward-looking statements, whether as a result of new information, future events or otherwise.
